InspectionReport InspectionID1108 PermitID5801 Date06 03 2016 03 00PM (2).pdf

Mr. Rodriguez,

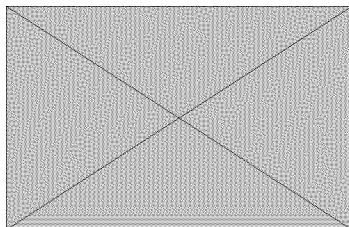

Ginny Hatch, Environmental Director, Yerington Paiute Tribe, recently recommended that NDEP correspond with you regarding the above mentioned release and potential impact to the Wabuska Drain, an operable unit associated with the Yerington Mine Superfund Site. Attached is our most recent inspection report for the Wabuska Power Plant, the facility responsible for the release.

The Tribe's consultant has sampled the Power Plant discharge, but due to the delay in reporting the spill, the water released from the impoundment cannot be adequately characterized. Unless the majority of the Drain has been impacted by the Superfund Site, it is unlikely that a release several miles downgradient would be a concern.

If you have any questions regarding this matter, please contact me.

Regards,

Bruce Holmgren
